

Medication and Supplies List for Diabetes Care in a Child Day Program Setting

Parents/guardians of children with diabetes will need to provide the child care provider with all the necessary medication, equipment, and/or supplies required to handle the child's medical needs. The following supplies should be available in the child care setting and will need to be replaced by the parent/guardian as they are used. These include, but are not limited to:

- insulin in properly labeled prescription vial from a pharmacy
- insulin syringes or 1-2 pump change set-ups or insulin pen and disposable needles
- ketone test strips
- alcohol swabs
- hypoglycemia treatment supplies (e.g., glucose tablets, small juice boxes, crackers)
- blood glucose meter and test strips
- lancing device and lancets
- glucagon emergency kit
- snacks (i.e. cheese or peanut butter crackers)
- sharps container (puncture-proof, labeled, and sealed plastic containers such as empty bleach bottles can be used as a substitute)
- band aids
- tissues
- waste receptacle
